

## PDF Annotation Line Endpoints Demo (/L, /LE)

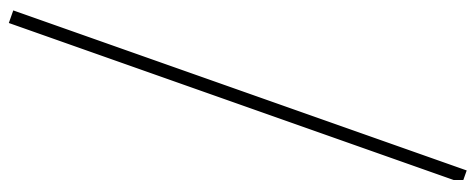

This page shows Line and PolyLine annotations with explicit line endpoints and line ending styles. We set /LE directly at the object level to ensure the PDF dictionaries contain the desired values.

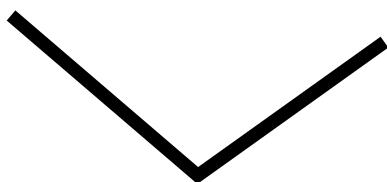

Line: /LE [/None /OpenArrow]  
/L = [90.0 230.0 260.0 290.0]

Line: /LE [/ClosedArrow /ClosedArrow]  
/L = [90.0 400.0 260.0 340.0]

Line: /LE [/ROpenArrow /Butt]  
/L = [90.0 470.0 260.0 530.0]

PolyLine: /LE [/OpenArrow /ClosedArrow]  
/Vertices = [90.0 585.0 160.0 645.0 230.0 595.0]

Common /LE values: /None, /Square, /Circle, /Diamond, /OpenArrow, /ClosedArrow, /Butt, /ROpenArrow, /RClosedArrow, /Slash
