

## PDF Annotation Border Properties Demo (/Border vs /BS)

This page contains two square annotations intended for testing scaling of border widths.

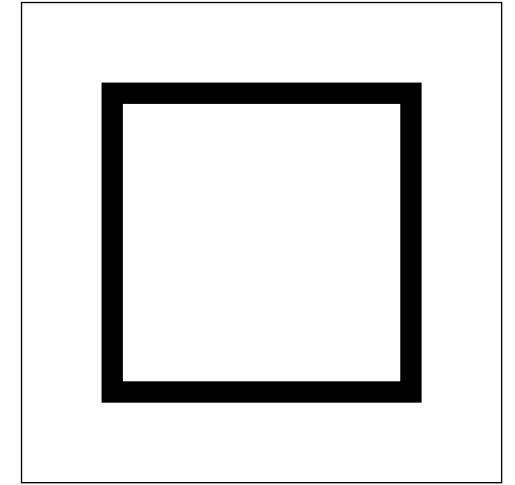

Left square: uses /Border [0 0 12] (width = 12 pt).

Right square: uses /BS << /W 8 /S /S >> (width = 8 pt, solid).

When applying a scaling matrix to annotations, both widths should scale proportionally.

/Border width = 12

/BS /W = 8
