

PDF Annotation Callout Line Demo (/CL)

This page demonstrates FreeText annotations with callout lines defined by the /CL key.
A callout line connects the annotation text box to a specific point in the document.
The /CL array defines the coordinates of one or more points forming this callout line.

Callout to Target A

Target A

Double-segment callout to Target B

Target B

Example 1: /CL [200 320 150 350]
? Single-segment callout from text box to Target A.

Example 2: /CL [300 420 370 470 450 450]
? Two-segment callout with a knee point, ending at Target B.

The /CL key defines the coordinates for the callout line of FreeText annotations.
